

MEGAVENT

"RC" make Megavent is a proven design in air purging for high efficiency and reliable operation in hydronic heating systems. Air trapped within the system can lead to corrosion and reduced heat transfer efficiency. The Megavent is installed at air accumulation points to automatically release trapped air and maintain optimal system performance.

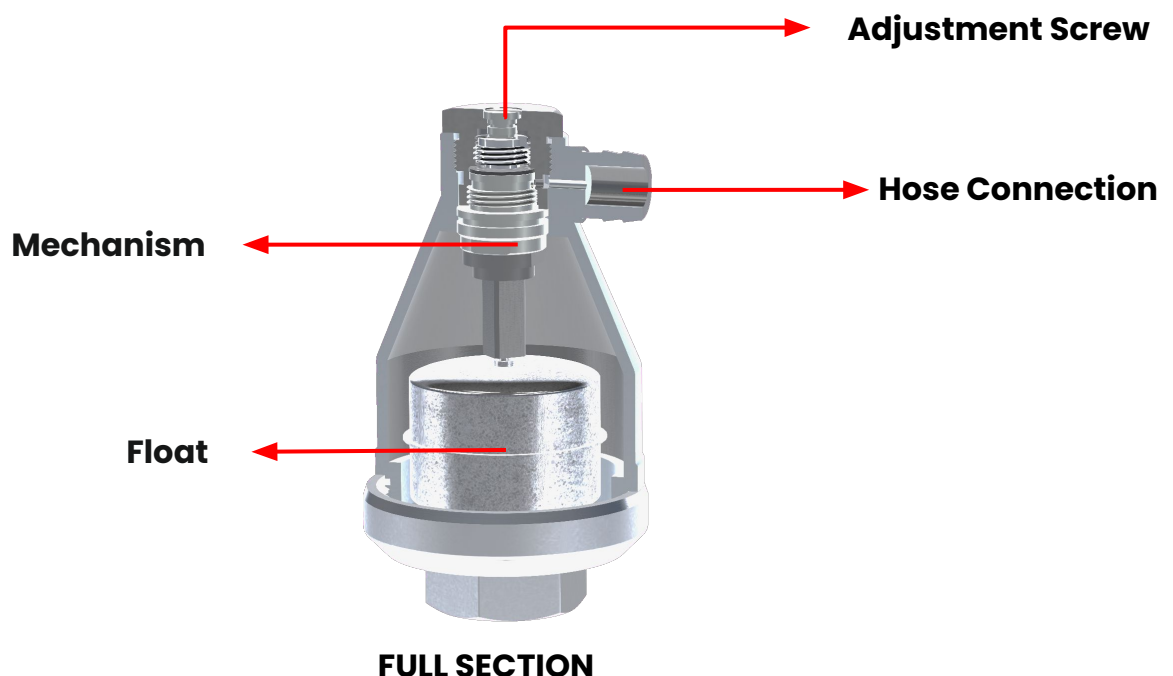

Advantages

- Conical design increases venting efficiency.
- Adjustable screw to controlling venting.
- Hose connection for drain
- All metal internals including metal float.
- Simple design for easy opening for cleaning and maintenance.

Basic Technical Specifications

- **Working Temperature Range:** -10°C TO 90°C
- **Working Pressure:** PN16
- **Construction** - CF8/CF8M
- **Float** - CF8/CF8M
- **O-Ring & Seating** - EPDM
- **End Connection** - Screwed/Flanged
